Midterm Project Report

For my midterm project report, so far I am mostly on schedule. My 4 milestones to have done by the midterm report were: **Data loading, Parsing, Projection, and Filtering.**

Right now I have all 4 <u>completed and working</u>. I could add a couple of edge cases to my data loading functionality but overall all 4 work properly. I'm doing the **SQL option solo** so everything is done by me. I am a little behind on my next 4 milestones for the **group by** and **aggregation** due to studying for a midterm this week. So I think those 2 functions might not be done until 10/23 instead of the original date 10/19. Overall I'm enjoying the project and have been making good progress.
